SIDDHANT DEMBI

DevOps Engineer | CI/CD | AWS | Linux | Docker | Infrastructure

siddhantdembi@gmail.com +91 8850003687 /siddhantdembi /siddhantdembi /siddhantdembi Mumbai, India

EDUCATION

Course	College / University	Year	CGPA / %
Bachelor of Engineering in IT	Thadomal Shahani Engineering College, University of Mumbai	2025	8.09 / 10

SKILLS

Cloud & DevOps	AWS (EC2, S3, Lambda, DynamoDB, Bedrock, IAM, CloudWatch, API Gateway), Azure DevOps, Docker, Git, CI/CD, GitHub Actions, Linux, Jenkins, Salesforce, Copado, Scripting, Kubernetes
Infrastructure	OPNsense, Prometheus, Grafana, Proxmox, TrueNAS, Cloudflare, WireGuard, Mailcow, Unbound
AI & Automation	Claude Code, Ollama, OpenWebUI, Hermes Agent, OpenClaw, Local LLMs, N8N, Stable Diffusion
Languages	Python, JavaScript, TypeScript, SQL, Bash, Shell Scripting, YAML, HTML, CSS

EXPERIENCE

DevOps Engineer | Deloitte USI, Mumbai | Full-time **Sept'25 – Present**

- Implemented an **AWS Bedrock AI agent** using Python and Lambda to analyse **40+** weekly GitHub PRs and classify their risk levels
- Built two **Azure DevOps YAML CI/CD pipelines** for Salesforce validation and deployment using the GitFlow branching strategy
- Managed CI/CD pipelines and Salesforce deployments using **Copado**, overseeing release operations across **12 project pods**
- Developed automated **CI/CD pipelines** connecting **GitHub Actions and Jira** to auto-create branches upon story status transitions
- Managed daily **Salesforce delta deployments** using **Jenkins and Bitbucket**, ensuring consistent and reliable production releases

Software Development Engineer | Ford Motor Company, Chennai | Internship **[Demo]** **Jun'24 – Jul'24**

- Developed 3D car configurator using **Three.js and Next.js**, supporting **450K+ configurations** with responsive UI via TailwindCSS
- Optimized complex 3D models in **Blender**, ensuring seamless integration and rendering in the interactive web application
- Containerized application with **Docker**, reducing deployment issues by **40%** and ensuring consistency across environments

Software Development Engineer | Entelligentsia, Pune | Internship **Dec'23 – Dec'23**

- Created **5 serverless REST APIs** using **AWS Lambda** and Python, integrated with **DynamoDB** for scalable backend services
- Set up **JWT authentication**, used regex for validation across 5 endpoints, and configured YAML with **Serverless Framework**

Data Analyst | Decimal Point Analytics, Mumbai | Internship **[Demo]** **May'23 – Jul'23**

- Reduced data preparation time by **50%** by developing **Streamlit applications in Python**, automating repetitive data cleaning tasks
- Achieved **30% faster CSV and Excel data cleaning** using **Databricks with PySpark**, improving overall workflow efficiency

PROJECTS

Proxmox Homelab Infrastructure **[Link]**

- Built and maintained **four on-premises server nodes** for self-hosted services, AI experimentation and infrastructure development
- Architected **100+ containers and 10+ VMs**, and ran a three-node **Kubernetes cluster using K3s**: one control plane and two workers
- Migrated infrastructure behind an **OPNsense VM** with **double NAT**, configuring three **subnets, DHCP, DNS, and firewall rules**.
- Leveraged **Cloudflare Tunnel** as a reverse proxy and managed DNS records through Cloudflare for secure service exposure
- Established **AdGuard Home with Unbound** for upstream DNS resolution and **WireGuard VPN** for secure remote network access

Local AI & LLM Automation Platform **[Link]**

- Set up a dedicated AI VM with **GPU passthrough**, running **Ollama and OpenWebUI** for local inference with open-source LLMs
- Configured **Hermes Agent** with local **Qwen and Gemma MoE models** for autonomous workflows with Telegram integration
- Used **Prometheus and Grafana** to monitor GPU memory usage and performance metrics of the dedicated AI VM
- Deployed **N8N** for workflow automation and **Stable Diffusion** for experimenting with local image generation

Infrastructure Monitoring & Backup System **[Link]**

- Implemented a **3-2-1 backup strategy** with daily scheduled snapshots for VMs and data, ensuring data integrity and recovery
- Centralized VM resource monitoring through **Beszel** with **SMTP alerts via a local mail server** for disk-space thresholds
- Monitored real-time resource utilization, processes and system activity across individual virtual machines using **Glances**

CERTIFICATIONS

AWS Certified Cloud Practitioner | **Google Cloud Gemini Enterprise Deployment Certified** | **Claude Certified Architect**
Claude Certified Developer | **Claude Certified Associate** | **NVIDIA AI Infrastructure and Operations**
